

## A 368 CONTROL VALVE

## A /B

Time-tested Duraflow flapper provides frictionless sealing for longer service life

Fiber-reinforced polymer valve body for superior strength and durability, non-corrosive, and UV-resistant

Optical sensor for precision cycle positioning

Designed with double backwash for reduced hardness leakage

Continuous service flow rate of 16.6 GPM with a backwash of 2.75 GPM

Backwash capability accommodates softener tanks up to 10"

Super capacitor for keeping time of day during power outage

Programming stored in memory and will not be lost due to power outages

History data for valve performance

Designed for single tank systems only

External drain line flow control

Softener only control valve

Plumbing connections in .75"-1.25" NPT, BSP, and sweat

Internal Autotrol turbine

**604-** Simple economic electronic time clock control.

**606-** Simple economic electronic meter control.

TESTED and CERTIFIED by the WQA to NFS/ANSI Standard 44 for Water Softener Performance.

UL recognized to the 979

TESTED EMC and Low Voltage Directive

Restriction of Hazardous Substance Compliant
